

How safe are in-home safes?

In home safes are fashionable these days, hidden in walls, floors or other non-conspicuous places, but just how safe are they? An in-home safe may put you at risk for a burglary or home invasion. In the event valuable contents are stolen, your insurance may not cover cash, silver, gold or may have a minimal coverage such as \$200 in value. Finally, many safes are not always fireproof. An intense fire could destroy the contents without the fire actually getting inside the safe.

A bank safe-deposit box might be the best place for your valuables. Call us at (334) 289-3564 and secure your safe-deposit box today.
